

Covid19 Risk Assessment

Ref	Hazard	Consequence	Cause	Controls	Risk Assessment		Residual Risk from Sessions	
					Likelihood Evaluation	Additional Measures	Likelihood Evaluation	Rating
<u>"Shielding" people and their carers</u>							%	
1	Covid19	Serious illness / potential death	Transmission from breathing in germs	Social distancing, groups of six only	medium	Exclusion from sessions	zero	A
2	Covid19	Serious illness / potential death	Transmission from contact with germs on a surface	Use of hand sanitiser by all, spraying cones and hoops with anti-bac spray	medium	Exclusion from sessions (cannot spray all surfaces with anti-bac)	zero	A
<u>"Vulnerable people"</u>								
3	Covid19	Serious illness / potential death	Transmission from breathing in germs	Social distancing, groups of six only	low	Ensuring participants attend only if well	Very low	T
4	Covid19	Serious illness / potential death	Transmission from contact with germs on a surface	Use of hand sanitiser by all, spraying cones and hoops with anti-bac spray	low	Ensuring participants attend only if well	Very low	T
<u>"Non-vulnerable" people</u>								
5	Covid19	Serious illness / potential death	Transmission from breathing in germs	Social distancing, groups of six only	Very low	Ensuring SDM is maintained by coach instructions	extremely low	T
6	Covid19	Serious illness / potential death	Transmission from contact with germs on a surface	Use of hand sanitiser by all, spraying cones and hoops with anti-bac spray	Very low	Spray any surfaces contacted or sneezed on with anti-bac	extremely low	T

Key and Notes on Risks:

- Medium risk – due to severity of illness if infected this risk must be reduced
- Low risk – risk is tolerable but should be reduced if at all possible
- Very low – risk has very low likelihood but because a potential outcome is death should be reduced if practicable
- Extremely low – would be acceptable, if death was not a credible outcome, so needs no further risk reduction
- A = Acceptable risk to individual, T is tolerable, U is unacceptable. Risk can only be reduced to tolerable level as a credible outcome is death
